Daily Sales & Inventory Dashboard

Proposal for Aurigans India Private Limited · from Daddy Solutions

THE PROBLEM

Aurigans runs multiple outlets across airports and campuses. Sales, stock and wastage figures sit in separate POS systems and spreadsheets. Management sees them late, and problems like stock-outs, over-ordering and unusual sales are caught after the money is lost.

WHAT WE'LL BUILD

One dashboard that gives owners and outlet managers a clear picture every morning.

Feature	What it does
Sales consolidation	Pulls sales from each outlet's POS automatically. No manual exports.
Outlet comparison	Daily and weekly sales by outlet, brand and item, with top and bottom sellers.
Inventory tracking	Current stock per outlet with low-stock alerts and reorder suggestions.
Wastage log	Simple entry for staff, with wastage cost reported by outlet.
Morning summary	Automatic WhatsApp or email report to management at a set time.
Anomaly alerts	A message when an outlet's sales or stock is out of the ordinary.

SCOPE

Included: up to [3] outlets at launch, one POS integration, one dashboard with role-based logins, daily summary report, alerts, staff training and a handover document.

Not included (available later): purchase-order and vendor workflows, staff rostering, customer feedback tools, additional outlets and integrations.

TIMELINE

Week	Milestone
1	Discovery: access to POS data, agreed metrics, signed-off scope
2	Data pipeline and first working dashboard on a live link
3	Inventory, alerts and morning report. Testing on real data
4	Training, go-live and 2 weeks of support

You see a working demo every week.

WHAT WE NEED FROM AURIGANS

- One point of contact who can make decisions
- Read access to POS data or exports for the starter outlets
- Current stock lists and the reports management uses today

WHY DADDY SOLUTIONS

- One senior team handles the whole job, from data to dashboard to support
- You own the code, the data and the infrastructure
- We stay after launch with support, fixes and updates

Next step: a 20-minute call to confirm the outlets and POS system. Then we send a final quote within 2 working days.
